I received an error that the CMOS battery was low, so I replaced the CMOS battery, turned off the computer and restarted. Now I am getting three errors 1. Diskette drive 0 seek failure 2. Keyboard Failure 3. Invalid configuration information please run SETUP program. The BIOS is Phoenix Award WorkstationBIOS v6.00PG I no longer have a floppy disk that I can insert in the computer to boot from. I want to get into the BIOS to tell the computer to not attempt to boot off the floppy disk drive

and just boot off the HDD or CD Rom. Unfortunately when I press F2 to enter SETUP, nothing happens. If I hold down F2 I can hear a ticking sound after a while and if I reboot and hold F12 which normally goes into the boot menu the motherboard beeps. So it seems the computer is in fact detecting the USB keyboard.http://www.saadawi1.net/upLoadedFiles/other/impulse-2830-loran-fish-finder-manual.xml

Back them it was either PS2 or USB but if the keyboard doesnt say Dell and belong to these 14 year old models then you may see a keyboard failure. Good way to learn about the past.They have to get into the BIOS and set the menu for the floppy drive to NONE. As I do not have a manual or such I can only offer this as a guide and never a step by step which many want today. MANY DELLS OF THAT DAY demanded we use the Dell keyboard that came with the PC.

Back them it was either PS2 or USB but if the keyboard doesnt say Dell and belong to these 14 year old models then you may see a keyboard failure. Good way to learn about the past. Not sure if it is knowledge folk need today. MANY DELLS OF THAT DAY demanded we use the Dell keyboard that came with the PC.To work these I shared we kept a couple around the shop.And today it may cause folk to think the motherboard is dead when its just a Dell thing. These issues are going to be lost to time. And you betcha we had a few techs that did not believe this until we pulled out the Dell keyboard and it helped. ALSO try this. Try holding down that F2 or such button before you power up and DONT LET GO. You may be holding it for 2 minutes but I recall that trick to work once in a while. Worth a try. Trying to find an old Dell keyboard now. Such device have a value of practically zero, so nothing much is lost anyway. To get rid of the message over the floppy, disconnect it. To enter the BIOS, the service manual says its F2 indeed, not F12. The timing is essential, so I usually tap that key once or twice a second after I turned it on. That usually works after a few tries, but only if there isnt a hardware issue with the motherboard. For the keyboard try other USBports. If you disconnect not only the floppy, but also the hard disk and insert a Linux DVD it should boot from that, even if you cant get into the BIOS. Maybe even from a bootable USBstick. Luckily, a working second hand PC to run of even install Linux on, isnt very expensive. I expect a lot of Windows 7 computers will get on the market now the support ends, and a working PC with Vista or XP is older and even cheaper. The service manual says they should work. It must be a problem with the motherboard.The error is well known and unplugging the floppy wont fix that issue. Also you still have the issue of the Dell only keyboard issue to face. It sounds like an old Dell to me. Thanks for your help!

https://directori.p2pvalue.eu/explore/cbpp-communities/community/datasheet/husqvarna-outlet-manuals

I cant know the exact keyboard needed due to the time that has passed but for a long time we kept one locked up in storage for the times this would occur. That is, folk would bring in a Dell with the same story as yours and we would show it working with our Dell keyboard and setup the BIOS to fix the missing floppy and you can imagine a few would think this is crazy stupid. Again, folk that run into this today think this is nuts but you are talking legacy PCs. The second message wants you to enter the BIOS setup. Possible dead CMOS battery which caused loss of settings. If you have a Wireless or even just a USB keyboard on an older computer, BIOS setting can prevent access to the keyboard. Try entering the BIOS by using the correct keyboard strokes to do so immediately after starting the computer. If an older desktop, and you still cant enter the BIOS setup try using a PS2 keyboard. Thanks Guru Computers Please remember to be considerate of other members. If you are new to the CNET Forums, please read our CNET Forums FAQ. All submitted content is subject to our Terms of Use. Dell Diagnostic Light s 123 all in solid. The manual for your system can be found here.Lights 1 to This is Dell diagnostic s, also light and beep codes. The second question Already have an error code from running ePSA diagnostic s Dell devices come with preboot diagnostic s to. We are a trusted supplier to 1000s of schools, government agencies, military and repair shops worldwide. Send your laptop to the Dell Experts! PartsPeople began as a small company 18 years ago in an extra bedroom of my house. I had saved a small sum of money to purchase some computer parts and began selling them on eBay.

https://www.mckenziefrienduk.com/images/Cornelius-Juice-Dispenser-Manual.pdf

After a few months I realized that people needed a place to go for Dell parts so I began building our website. Since we are located in Austin, Texas, where Dell.com was founded, I was able to set up a solid supply line with Dell. From the start, we focused on customer satisfaction and selling quality parts. We have grown a lot since 2002 but still and always the customer will come first. You will find that we go above and beyond with every order and offer free resources and support before and after the sale. PartsPeople.com has become the leading supplier of Dell laptop and tablet parts for

consumers, businesses, government agencies, computer repair shops, school districts, and corporate firms. All orders are shipped same day MF from our 14,000 squarefoot Austin, Texas facility and also include a 1 Year Warranty! Although we are not affiliated with the Dell Computer Corporation, we have been specializing in Dell Laptop parts and Dell laptop repair services more than 18 years. At PartsPeople.com you can find whatever you need for your Dell laptop. This is why we have become the leading supplier of Dell laptop and tablet parts for consumers, businesses, government agencies, computer repair shops, school districts, and corporate firms. We offer all Dell parts for your business and individual Dell computer needs and have done so since 2002. We also offer Dell laptop repairs at our 14,000 squarefoot facility in Austin, Texas. We keep a large inventory of Dell laptop parts and refurbished Dell laptops so we can replace your Dell computer if it cannot be repaired. Also at this facility, is our Dell notebook recycling center. There are over 750,000 Dell laptop parts ready to ship, for your online order. Our online inventory is updated in realtime, to ensure that we only sell parts we have in stock. We can do this because we inspect all of our parts a minimum of five times before shipping them to you, and we have a high standard for the quality of all of our parts.

We are confident that we will not receive parts back because of poor quality. We offer shipping through FedEx and the USPS with the option for rush delivery for the next business day. Also, we sell items in bulk to allow additional discounts on overstocked items. Call us today to setup your account with reseller discounts. We do not offer parts or service for any other manufacturers products. That means that we have a focused expertise on Dell products. Our service is used by school districts and laptop repair shops across the nation. We offer our services worldwide, but we keep our services personal. We believe in strong customer service, and we have many repeat customers because of our expertise, integrity and personal response. We dont charge hourly fees. We are a company that believes strongly in customer service. Our customers return to us for Dell repairs, not only because of our expertise, but because of our integrity and personal response. We do that to show our appreciation. Dell Laptop Repair Discounts Learn how to install LCD screens, motherboards, and DC power jacks. You will find step by step instructions with pictures and videos tutorials. Free Dell Laptop Repair Manuals We offer this service to assist in safe disposal of peoples old laptops. Laptop Recycling. I googled it and found suggestions to replace the battery.

After I put the new battery in I get this diskette drive 0 seek failure Keyboard Failure Invalid information configuration please run setup program alert system voltage battery is low. I googled again to find out I need to enter the BIOS to get to setup but I cant do that if it wont read USB on boot. My keyboard is USB and the computer doesnt even have any PS2 inputs. Someone please help! The procedure is described in the manual. You should a hope rather than an instruction be able to access Dell BIOS then unsure of proper key, F2. F12, Esc, DEL in manual. Manual may have tips. So I cannot enter any f keys or esc or del or anything. But now I cant even get it to recognize the monitor so I cant do anything until I can get that part fixed. So I cannot enter any f keys or esc or del or anything. But now I cant even get it to recognize the monitor so I cant do anything until I can get that part fixed. Ive given a link about how to access the BIOS in case you have the Fast Boot option set. If youve been working inside the computer without any precautions against static charges its possible that the motherboard is damaged. I make sure theres no power connected and keep touching the metal frame of the case before touching components. Its worked for me so far. Terms of Use Privacy Policy Advertise.
