WARNING To reduce the risk of fire or electrical shock, do not expose the product to rain or moisture. WARNING Do not expose this apparatus to dripping or splashing, and do not place objects

filled with liquids, such as vases, on or near the apparatus. As with any electronic products, use care not to spill liquids into any part of the system. <http://www.heimatforschung-marktleuthen.de/lexikon/bilder/colt-defender-owners-manual.xml>

WARNING The lightning flash with arrowhead symbol within an equilateral triangle alerts the user to the presence of uninsulated, dangerous voltage within the system enclosure that may be of sufficient magnitude to constitute a risk of electrical shock. The exclamation point within an equilateral triangle, as marked on the system, is intended to alert the user to the presence of important operating and maintenance instructions in this owner's guide. **CAUTION** Make no modifications to the system or accessories. Unauthorized alterations may compromise safety, regulatory compliance, and system performance. **WARNING** Keep the remote control battery away from children. It may cause a fire or chemical burn if mishandled. Do not recharge, disassemble, heat above 100°C (212°F), or incinerate. Dispose of used batteries promptly. Replace only with a battery of the correct type and model number. **WARNING** Danger of explosion if battery is incorrectly replaced. CineMate series II remote—Replace only with Dura cell, Eveready, Energizer, Maxell, Toshiba, or Shun Wo CR2032 or DL2032 3-volt lithium battery. Please dispose of used batteries properly, following any local regulations. Do not incinerate. **WARNING** Do not place any naked flame sources, such as lighted candles, on or near the apparatus. Note This product must be used indoors. It is neither designed or tested for use outdoors, in recreation vehicles, or on boats. Additional Safety Information See the additional instructions on the Important Safety Instructions sheet North America only enclosed in the shipping carton. For your records The serial number is located on the rear of the Acoustimass module. Setup help The CineMate system easily connects to your TV and other home theater equipment. If any part of the system appears damaged, do not try to use it. Notify Bose or your authorized Bose dealer immediately.

WARNING To avoid danger of suffocation, keep the plastic bags out of the reach of children. Copy that number in the space provided on page ii for easy reference when registering your system. CineMate series II speakers OR. Acoustimass module. Small rubber feet Large rubber feet CineMate series II remote OR. CineMate GS series II remote. Peel the protective film off the lens on the front of the interface module. Note The remote should have a clear line of sight to the interface module, the TV, and any other equipment it will control. **CAUTION** When positioning the interface module, avoid blocking any ventilation openings on the TV or other electronic equipment. If your TV has both types of output connectors, you should use the optical connector. Using the optical connection gives you the highest quality digital sound. Note To receive the highest quality digital sound from the sources connected to your TV, connect those devices to your TV using an HDMI cable. When your TV is connected to the optical input on the interface module, the analog input cannot be used as a second audio input. Connecting analog audio If your TV is not equipped with an optical connector, use the supplied stereo audio cable to connect from your TV audio output connectors to the interface module ANALOG IN connectors. The stereo audio cable has two RCA connectors at each end, one red and one white. It connects to left L and right R audio outputs on the rear panel of your TV and the interface module. If your TV provides both fixed FIX and variable VAR audio output connectors, use the fixed connectors for higher sound quality. Be sure to select Fixed in the setup menu of your TV. Your TV may have an onscreen audio menu that includes an option for turning the TV speakers on or off. Turning off the TV internal speakers Newer TVs normally have a setup menu item for turning off speakers. Using a TV setup menu 1.

Use your TV remote to display the audio menu on your TV screen. 2. Locate the menu item to turn your speakers on or off and select Off. If your TV does not have a menu setting for turning off the internal speakers, exit the audio menu and reduce the TV volume to its lowest setting. Voltage variations and spikes can damage electronic components in any system. Note The CineMate series

The remote control only operates your CineMate series II system. Using the remote to control the CineMate system When you point the remote control at the interface module and press a button, the green LED on the interface module flashes. Press On/Off to turn on the CineMate system. Press again to turn the system off. Press Volume Up to raise the volume. When maximum volume is reached, the green LED on the interface module flashes twice. Press Volume Down to reduce the volume. When the minimum volume is reached, the green LED on the interface module flashes twice. Press Mute to silence the audio. Press Mute again to restore the audio. Press again to turn the system off. Press Volume Up to raise the volume. When maximum volume is reached, the green LED on the interface module flashes twice. Press Volume Down to reduce the volume. When the minimum volume is reached, the green LED on the interface module flashes twice. Press Mute to silence the audio. Press again to restore the audio. When the system is muted, the green LED on the interface module flashes until audio is restored. Setting the remote for your TV and other devices To use the remote with your TV, you must set the remote for the proper TV device code. 1. Locate the TV section in the Universal Remote Device Codes book. 2. Locate the device codes for your brand of TV and start with the first one. 3. Press and hold Setup on the remote until all five source buttons light up. 4. Press the TV source button. Only the TV source button will remain lit. 5.

On the remote keypad, enter the first device code for your brand of TV. 6. Check that the TV source button blinks twice and turns off after the code is entered. 7. Point the remote at your TV and press TV On/Off. If your TV does not respond, go back to Step 1 and try another code. Note During programming, the five source buttons will flash rapidly three times if you press an invalid key or enter an unavailable device code. The green LED on the front of the interface module will light. 2. Press the TV source button. The button will flash to indicate that the remote control is in TV mode. 3. Use the remote to select a channel and navigate menus. In addition to controlling TV functions, the remote will control the basic CineMate speaker functions, such as turning on the speaker system, changing the volume, and muting or turning off the speaker system. The button will flash to indicate that the remote control is in DVD mode. 4. Use the remote to control play options and navigate DVD menus. In addition to controlling DVD functions, the remote will always control the basic CineMate speaker functions, such as turning on the speaker system, changing the volume, and muting or turning off the speaker system. These inputs are commonly labeled TV, Video 1, Video 2, and AUX on the back of the TV. If you have multiple inputs connected to your TV, you may need to press this button several times to find the correct input. Switching control from one device to another The source buttons light up when selected to indicate which source the remote is currently controlling. You can easily switch control from one device to another by pressing the source button that corresponds with the source you want to control. Some features may not be supported by your brand. The source that will record a program VCR or DVR must be selected. Teletext buttons Operate only Turns on the Teletext feature if supported.

Turns off the Teletext feature if supported. Expands Teletext top. Press again to expand Teletext bottom. Refer to page ii for battery safety instructions. Be sure to dispose of the batteries according to the regulations in your area. 3. Insert two AA IECR6 1.5V batteries, or the equivalent. See "Selecting the TV input" on page 20. Find your device and brand in the Universal Device Codes book. Try programming another code, then check the device for improved functionality. It even comes with a universal remote control, so that you can control all of your entertainment devices with a single remote. Its easy to use and easy to setup, too. Thats right, no confusing installation with the CineMate. It comes with intuitive oneway connectors, so youll be enjoying that multichannel sound in no time. Order the Bose CineMate Digital Home Theater Speaker System today!Equipped with two front speakers and a compact Acoustimass module, this Bose speaker system facilitates easy installation with just four intuitive connections.

Moreover, you can experience your favorite shows come alive by connecting with this stereo speaker system to your TV. Thanks to the proprietary TrueSpace digital processing circuitry, this Bose speaker system reproduces clear and distortionfree sound aided by its audio channels. What's more, you can listen to clear, soft sounds in a movie, as the powerful Bose Cinemate speaker supports the digital dynamic range speaker compression circuitry. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later.The CineMate is the perfect unit to add theater sound to an office, bedroom, or apartment where a larger, more powerful system is not realistic due to space or sound output requirements. The CineMate is simple and straight forward to setup. As with any system, location of the speakers is important. Locate the small front speakers to the sides of the TV screen, the subwoofer placement is not critical more later, but because the amplifier and audio connections are located in the subwoofer, it must be placed fairly close to the TV unless you use longer cables from the audio out of the TV and then you are still limited by the length of the speaker cables which have custom connectors molded on. The front speakers provide sharp, accurate sound, the bass is good without being over powering. No, you arent going to feel the bass in your gut, but then this system was never intended to do so. Several reviewers were disappointed with the bass response; even though subs are nondirectional, their output can be influenced by several factors within the listening area. Try turning the sub unit, sliding it further way from a wall or closer to it.It was supereasy to set up, too. The hardest part was just getting it out of the box and that was easy!.

Anyway, the sound quality is nice and a huge jump from the regular TV soundwhich its a DLP and the sound is okay, but this just gives it a much nicer quality. Also, for the price you cant beat it, considering its a Bose. We also have the 7speaker system and although the sound is better on that, youre not paying a few grande for this set. I totally recommend this for those who dont have the

money to chunk down on a bigger set, or for those like us who dont have a good floorplan for running surround sound in this room. There are plenty of good reviews already, I just wanted to highlight 2 things 1 if you use a Samsung BDP2500 1080p Bluray Disc Player or, presumably, any Samsung Bluray player the universal remote pause button does not function. 2 ignore the folks who say that, since this isnt driven by your digital output, this is not a worthwhile system. I have a Bose 321, in ear headphones, radio, speakers in my SUV and just recently the Cinemate system. The Bose Cinemate theater speaker system is a must have if you want to upgrade the sound of your TV, DVD and or VCR output. There is ease of setup and operation with sound worthy of comfort in any small room. I have mine hooked up in my bedroom. I have not heard complaints from my neighbors as yet, but Ive noticed that my wife has begun to crank up the volume as well. Once the system is set up there is nothing to do but to turn it on and off as desired. The television speakers are turned off during setup, so your equalizer settings of your TV provide the desired Bass and treble. I have had to reduce the base and volume settings while listening to some CDs, but other than that I just turn it on as needed. An interesting feature is the universal nature of the remote when correctly setup. One can control other devices with the Cinemate remote. Pick one up and be prepared for a pretty lively room. I realize in many ways this is poor praise for such an excellent system which is a supplement to a TV speaker.

So this system is a blessing. I did not seek exceptional reproduction of TV but to listen normally and not miss the blurred sounds. It does the job. Bose is a great telephone information and help company. They actually hold your telphonic hand. AWESOME, ACCURATE, sound !! All I can say about those that are giving this a negative rating is that they must NOT be able to follow directions or have a lame set up to begin with. If you want great accurate sound this is for you. The Bose acustimass simply kicks ass when called upon. I should have read the specs more carefully. Had a difficult time setting it up. Had to purchase a converter box converts analog RCA cables to optical cable. Box worked fine. I wish the woofer provided more base.
